

# Integrated IT for mobile management

**Computer Associates International, a world leading e-business solutions provider, and Nokia have joined forces on a fully integrated information technology solution that provides enterprise-class manageability across the wireless computing landscape.**

Through this co-operation, the companies' mutual clients can incorporate the Nokia 9210 Communicator as a valuable business platform in the context of their overall corporate IT management schemes.

The project came about in response to growing customer demands for greater control of state-of-the-art mobile devices such as the Nokia 9210 Communicator, which have become essential components in today's dynamic e-business environment.

## **Empowering enterprise customers**

By allowing Computer Associates and Nokia to integrate their respective e-management and intelligent communications technologies, the co-operation will empower enterprise customers with the ability to manage intelligent wireless devices as nodes in a network.

As with desktops, servers and other mission-critical resources situated across corporate environments, companies must continually manage their intelligent wireless devices. In

addition, the mobile communications platforms must be constantly kept up to date in order to operate at peak performance. The integration of CA's products with Nokia technology provides automated and hands-free updates to vital applications and data.

## **Bringing technology together**

With the Nokia 9210 Communicator, the user is able to stay in constant
