Application Guide

Introduction

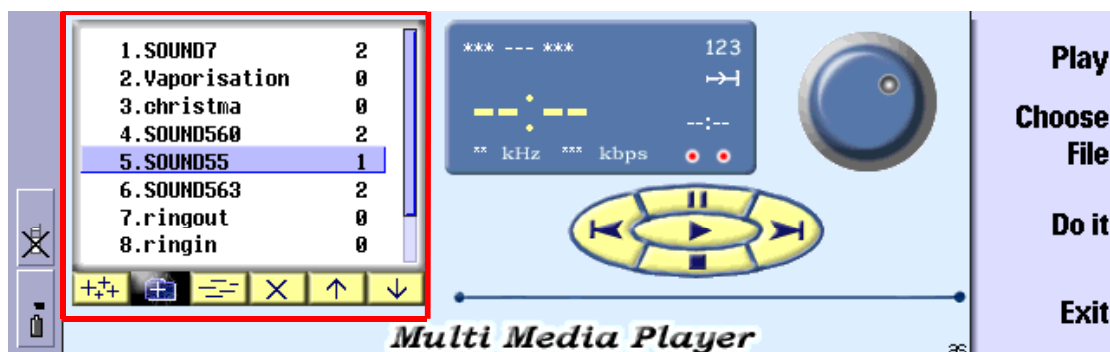

Multi Media Player provides full support for **audio playback** yet not available on Nokia 9210/9290 Communicator.

After installing **Multi Media Player** in your Communicator, you will be able to play majority of audio files covering **WAV, SND, AU** and **mp3** (after installing **Mp3 Decoder Plug-in**)

Multi Media Player uses advanced audio decoding techniques to bring you a good quality sound with low processor usage.

The Playlist

With **Multi Media Player** you can customise playback with the playlist. You can Add, Delete and move files. **Multi Media Player** supports m3u playlist format so you can transfer playlist from and to your PC/Mac. You can save and load a playlist in Menu | File

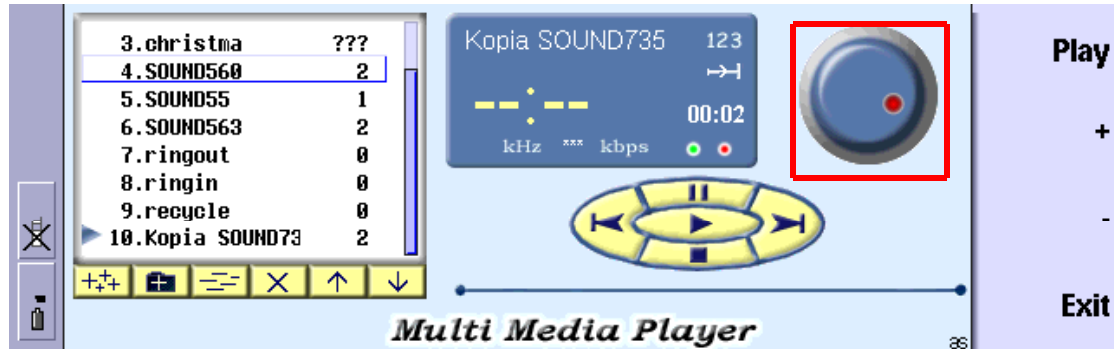

Controls

Controls in **Multi Media Player** are similar to controls in ordinary player.

Volume Control

You can change volume simply by pressing up or down arrow (when volume setting is active) or +/- button.

The bar

Control bar is used to rewind audio sample so you can start listening from e.g. middle of the file. To use the bar simply move arrows left or right to a point you wish. Time indicator will show you which second you will start playing.

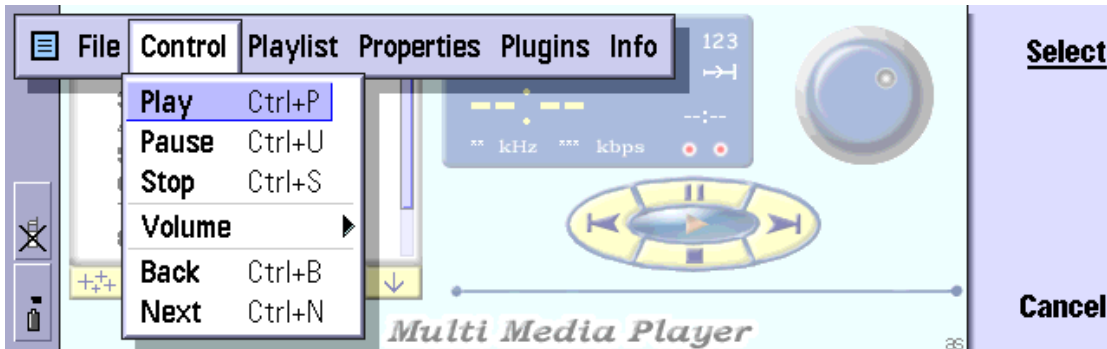

Info Play

In Info Play title, maximum time, progress of play, file description and settings are displayed.

Menu

All the buttons that can be normally used have a relative button in the menu. In the menu you can save or open playlist, start playback, manipulate playlist or get information about mp3 decoder and the program.

Mp3 plug-in technology

Multi Media Player uses plug-in technology for mp3 decoding. You can download latest decoder without need to reinstall whole application. Currently **Mp3 Free Decoder** is available so you can listen to your favourite music in mp3 technology on 9210 free of charge.

Hot-key table

Hot-key is a shortcut by which you can easily execute any command by pressing combination of keys.

About	Ctrl + A
Exit	Ctrl + E
Inspect subfolders (On/Off)	Shift + Ctrl + I
Next file	Ctrl + N
One Down (playlist)	Shift + Ctrl + D
One Up (playlist)	Shift + Ctrl + U
Open playlist	Shift + Ctrl + O
Pause	Ctrl + U
Play	Ctrl + P
Previous file	Ctrl + B
Prompt before clearing (On/Off)	Shift + Ctrl + P
Repeat (On/Off)	Shift + Ctrl + R

Save playlist	Shift + Ctrl + S
Shuffle (On/Off)	Shift + Ctrl + F
Stop	Ctrl + S
Volume Down	Ctrl + Q
Volume Up	Ctrl + L
