

LightPlus V1.0 for Series 80

A small OPL program for managing the display standby time.

The file LightPlus10.zip contains:

- 9500-opl-public-2004-11-28.sis (OPL Runtime for Nokia 9500/9300)
- LightPlus.sis

Install this two files on your Communicator 9500/9300. Ignore the error messages depending on the early release of the runtime.

Visit my website and my OPL forum !
